## REPORT OF COMMITTEE FOR THE DEDICATION OF SOLDIERS' MONUMENT.

*Mr. Moderator and Gentlemen:—*

The Committee of fifteen chosen at a special Town Meeting held on the evening of April 24, 1895, to arrange for a celebration and the dedication of the Soldiers' Monument on the Fourth of July,—consisting of the following gentlemen: H. H. Atherton, Charles H. Bond, I. E. Graves, Levi G. Hawkes, Lewis P. Hawkes, Charles H. Mansfield, Wilbur F. Newhall, Herbert B. Newhall, P. H. Nourse, Frank E. Parker, Arthur B. Smith, Isaac H. Stearns, Charles O. Thompson, Benjamin F. Robinson and James Maxwell,—respectfully submit the following report of their doings:—

The Committee met on April 30 and organized with I. E. Graves, chairman; I. H. Stearns, secretary, and Levi G. Hawkes, treasurer. Mr. Maxwell and Mr. Robinson tendered their resignations as members of the Committee, and John B. Walton and Elbridge S. Upham were chosen to fill their places. As the Town could not legally appropriate any money to carry out the arrangements, the Committee immediately took steps by issuing subscription papers to raise money for the same. At this meeting the Committee decided to have two parades—antique and horrible parade in the morning, and a military, civic and trades' procession in the afternoon; also decided to invite the Department officers of the G. A. R. to dedicate the monument. Various sub-committees were appointed at this meeting to arrange for these and other matters. Twelve more meetings were held previous to the Fourth, at which more sub-committees were chosen to arrange for other matters as they came along, and as the report of the subscription papers came in very favorably, the Committee laid out quite an extensive celebration and dedication.

The total amount of money received by subscription was \$824.25; total amount paid out, \$797.58, leaving a balance of \$26.67, which was voted by the Committee to be turned over to the relief fund of Post 95, G. A. R.

The monument was dedicated by the Department officers in a most beautiful and impressive manner, and the Committee

believe that the dedication was one worthy of the occasion, and the citizens of Saugus have good reasons to congratulate themselves on the final solution of the long-delayed question of the dedication of the Soldiers' Monument.

There is one point that the Committee deem worthy of special mention in connection with the matter, and that is the business enterprise shown by the house of the L. A. May Co. of Lynn, whose property was burned at 11 o'clock on the 3d of July and who had the order to furnish the dishes for the supper on the Fourth, and were to be delivered on the evening of the third at 7 o'clock, and notwithstanding their loss, they arrived with the dishes at 9 o'clock.

ISAAC E. GRAVES, *Chairman.*

ISAAC H. STEARNS, *Secretary.*

LEVI G. HAWKES, *Treasurer.*

*Elmer B. Newhall, Town Clerk, Town of Saugus, Mass.:—*

Dear Sir: In pursuance with Chapter 417, Section 101, Acts of 1893, the Selectmen of the Town of Saugus hereby report in regard to the proposed Precincts of the Town, which we have divided as follows:—

The Town is divided into three Precincts.

*Precinct No. 1*, including Saugus Centre, Oakland Vale and North Saugus, is bounded as follows:—

On the north by the Lynnfield and Wakefield lines; on the south by Knowles Avenue, Herbert Avenue and Adams Avenue, to Vine Street, thence due west from the south side of Pine Street, crossing Broadway, north of Essex Street, to the Melrose line. All houses on the north side of the above-mentioned Streets being in Precinct No. 1, with the exception of Pine Street, which includes both the north and south sides of said street.

*Precinct No. 2* is bounded on the north by the line through the centre of Knowles Avenue, Herbert Avenue and Adams Avenue, and all south of a straight line drawn from the south side of Pine Street through to the Melrose line; on the south by Revere Town line; on the southeast by a line running from Knowles Avenue in a northeasterly direction to the estate of

H. A. Nowell on Winter Street; on the east by a line running in a southeasterly direction from the estate of H. A. Nowell on Winter Street, through to the Revere line, passing between the old Hawkes House in Precinct No. 2, and Trefetheren's, Precinct No. 3, on Lincoln Avenue; on the west by the Melrose line.

*Precinct No. 3* is bounded on the north by the Lynnfield line; on the northwest by a line running from Walnut Street in a southeasterly direction through Fairmount Avenue to a point on the Saugus River between Saugus Centre and East Saugus, near the railroad track; on the west by a line running from the aforesaid point to the estate of H. A. Nowell (Nowell estate being in Precinct No. 1); on the west and southwest by a line running from the estate of H. A. #### COMMONWEALTH OF MASSACHUSETTS.

Senate, Feb. 21, 1895.

The Committee on Towns, to whom was referred the petition of the Town of Saugus for authority to incur indebtedness, for the erection of school buildings, beyond the limit fixed by law, report the accompanying Bill.

For the Committee,  
GEO. H. REED.

#### AN ACT

To authorize the Town of Saugus to incur Indebtedness,  
Beyond the Limit Fixed by Law, for School Purposes.

*Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:*

Section 1. The Town of Saugus for the purpose of acquiring land for a schoolhouse, or schoolhouses, and of erecting and furnishing said building, or buildings, may incur indebtedness to an amount not exceeding thirty-six thousand dollars and may issue negotiable bonds, notes or certificates of indebtedness therefor, bearing on their face the words "Saugus schoolhouse loan," bearing interest at a rate not exceeding four per centum per annum. The principal of said bonds, notes or certificates of indebtedness shall be payable three thousand dollars in the year nineteen hundred and four and a like sum in each succeeding year until the whole amount of said indebtedness is provided for. Said town may sell said bonds, notes or certificates of indebtedness, or any part thereof, at public or private sale; *provided* that the same shall not be sold for less than the par value thereof.

Sect. 2. The indebtedness incurred under this act shall not be considered or reckoned in determining the authorized limit of indebtedness of the town of Saugus under the provisions of section four of chapter twenty-nine of the Public Statutes.

Sect. 3. The provisions of section nine of chapter twenty-nine of the Public Statutes as to the establishment of a sinking fund and the provisions of chapter one hundred and thirty-three of the acts of eighteen hundred and eighty-two as to making annual proportionate payments shall not be binding upon the town of Saugus as applying to the indebtedness herein provided for.

Sect. 4. This act shall take effect upon its acceptance by a majority vote of the voters of the town of Saugus present and voting thereon at a legal town meeting called for that purpose within one year from its passage, but the number of meetings so called shall not exceed three.

The foregoing act passed both houses of the Legislature, was signed by the Governor and accepted at a special meeting March 28. Vote: Yes, 132; No, 33.

## OVERSEERS OF THE POOR.

---

SAUGUS, Dec. 31, 1895.

Affairs in the Poor Department remain about the same as they were last year. The farm is in good condition and has been kept up to the standard of other years. The buildings are in fair repair with the exception of the barn which needs shingling and for which we must have an appropriation this year, also for doors on the wagon sheds which are much needed for the protection and safety of our wagons and farm implements. In the outside department the calls are increasing every year.

The whole amount of Orders drawn by the Overseers' Department amounts to \$5,246.21, as follows: For insane, \$1,787.52; for partial support of 91 persons, \$1,313.06; for Town Farm, \$2,037.14; for repairing buildings \$50.80; Town Physician, \$25.00; incidentals, \$32.69.

As the numbers dependent on this Board are increasing every year we must have a larger appropriation, therefore we would recommend the sum of \$5,000 to meet the requirements of the Poor Department for the present year, and \$500 for repairs on buildings on the Town Farm.

H. O. PRATT,  
GEORGE FAULKNER,  
ANTHONY HATCH.

## SELECTMEN'S REPORT.

---

In presenting the Annual Report of this board, we desire to call the attention of our citizens to the fact that our increase in population necessitates an increase in our expenses, and we trust that in considering the appropriations for the ensuing year, you will give this matter careful consideration.

### *Highways.*

Owing to the small appropriation made for this important department in 1894, and the large amount of damage caused by the heavy rains during the past summer and fall, this department has necessarily retrograded to a considerable extent. To place our fifty miles of streets in the condition that our citizens all desire will entail the expenditure of considerable time and money. The following streets are in extremely bad condition: Winter Street, Essex Street from the railroad crossing to the square in Precinct Two, and Lincoln Avenue from the square in Precinct Two to Ballard Street in Precinct Three. With these streets in the condition their importance warrants, the streets of the town will be in excellent repair, and can be kept so with little expense.

### *Salem Turnpike.*

By a vote of the Town the Board of Selectmen for 1894 petitioned the State Highway Commission to make this thoroughfare a State road, which will be done as soon as possible after the adjustment of the rights acquired by the L. & B. R. R. Co. through State Statutes, has been made. This important road has been gradually improved by the thorough manner in which our Superintendent of Streets has done his work.

### *Street Lights.*

This department has given general satisfaction, and we would recommend an increase in the appropriation, thereby doing away with the oil lamps and giving better service to our citizens.

*Fire Department.*

We regret that in the early spring the members of Hook and Ladder Co. No. 1 and Hose Co. No. 1, located in Precinct One, disbanded, thus causing considerable uneasiness among the insurance companies. Shortly after this the Hook and Ladder and Hose companies reorganized, and new companies were formed whose members comprise many of our best young men. We congratulate the citizens of the Town on the small loss they have sustained through fire during the past year. Our Chief Engineer has brought the department to a state of efficiency not surpassed by any town in the state with equal facilities, and we trust the Town will see the wisdom of making a sufficient appropriation to carry the department on in a creditable manner.

*Public Buildings.*

We would call the attention of our citizens to the general appearance of some of our public buildings, which to say the least is not of particular credit to the Town. We would recommend an appropriation sufficient to complete the work commenced on the interior of the Town Hall, which has met with general commendation, and to give other buildings proper attention.

*Cemetery.*

To enable the Town to dispose of lots in the Cemetery, it is necessary to open and grade more avenues. The Cemetery cannot be kept in its present neat and creditable condition, and the salary of the Superintendent paid out of the usual appropriation. We would recommend that the Town fix a salary for the Superintendent of the Cemetery, and make an appropriation therefor.

*Police.*

The question of police protection has given rise to considerable discussion during the past few years, and we would urge upon our citizens the wisdom of making an adequate appropriation for such protection. For the sum of \$1,800, and the court receipts, a patrolman can be provided for each precinct. A detailed account of the work of the Police Department for the past year can be found in the report of the Court Officer.

*Finance.*

Close perusal of the Treasurer's and Auditor's reports will show that the Town is in a good financial condition, and that prudent and careful management of the Town's affairs will soon place us on an excellent footing.

We recommend the following appropriations for the ensuing year:—

Selectmen's incidentals	.	.	.	.	.	\$5,500 00
Highways and Bridges	.	.	.	.	.	6,000 00
Salem Turnpike	.	.	.	.	.	1,000 00

## REPORT OF SUPERINTENDENT OF STREETS.

---

I have had a great desire to see the time when the repairs on our streets would overtake the wear, but have been disappointed owing, I think, to the very foolish policy of reducing the appropriation in 1894 and the great showers and rains that have occurred within the last two years. It will take at least two years, with a good liberal appropriation, to put them in proper condition. I think the people of the Town see the folly of cutting down the highway appropriation, and will vote a good sum for the present year, so that our streets may be brought back to a fair condition. The Town is growing and the people are crying out better streets and sidewalks. I hope there will be a special appropriation made for sidewalks and for the moving of snow. The selectmen have purchased the past year a street roller, which is a great help in repairing the streets, and have also provided a shed for the tools of the Street Department, which was very much needed. I hope the Town will make the appropriation enough this year so that what should have been done the past year can be done this.

J. L. EDMANDS,  
*Superintendent of Streets.*

### *Hydrants.*

Whole number, 131.

During the year we have had two fires where we could not use our apparatus on account of there being no water—the two barns owned by E. W. Bostwick in West Saugus.

### *Recommendations.*

We would recommend that the Town appropriate six hundred dollars for the purpose of buying new hose, as the old hose, which has been in service seven years (on account of not having sufficient quantity to make a change), is fast becoming unfit for use.

We would recommend that the sum of three hundred dollars be appropriated for the purpose of increasing the number of fire-alarm boxes.

We would recommend that the members of the Fire Department be paid some stated sum per year, as under this plan the membership in the companies would be reduced and the efficiency of the Department be benefited.

We would respectfully recommend that the sum of fifteen hundred dollars be appropriated for the expenses of this Department the ensuing year.

Respectfully submitted,

CHARLES O. THOMPSON, Chief Engineer.

J. ARTHUR FARNHAM, Assistant and Clerk.

JOHN BRIERLY, Assistant.

## REPORT OF THE BOARD OF HEALTH.

---

Saugus, Jan. 1, 1896.

The Board of Health respectfully submits its annual report for the year 1895.

The Board was organized as follows:—

GEORGE W. GALE, M. D., Chairman.

LEVI G. HAWKES, Secretary.

BENJ. F. ROBINSON, Inspector.

Regular meetings were held at the Town Hall on the first Monday of each month at 7.30 P. M., for the transaction of such business as might come before it.

Rules and regulations for the public health and safety previously used were adopted.

Cases of contagious diseases reported to the Board during the year are as follows: Diphtheria, 16; deaths, 2; scarlet fever, 42; deaths, 5; measles, 2; typhoid fever, 5; deaths, 1.

The increased number of cases of contagious diseases during this year has not been confined to this Town alone, but has been found to exist throughout the state. During the early part of the year a few cases of malignant scarlet fever made their appearance. The type of this disease was very severe and its duration short. The Board at once made a thorough inspection of the premises where the disease prevailed and concluded that the cases could be attributed largely to the very unsanitary condition of the premises. The nuisances found were promptly abated and thereby a serious epidemic prevented. In some of these cases garbage and other refuse matter had been allowed to accumulate in cellars and yards; leakage from cesspools which were full and imperfectly constructed, and broken drain pipes, caused surface drainage which, in some cases, leaked into the cellars. Many of the pipes were not trapped.

The most perfect sanitary conditions in and around all dwellings should be observed, and nothing should be allowed to accumulate that pollutes the air by producing obnoxious

odors. This impure air not only produces, but favors the spread of disease after it is once established.

The majority of cases of diphtheria and scarlet fever occurred during the summer and fall months, and were generally of a mild type.

During the prevalence of these diseases we deemed it prudent that the schools should be closed for a short time.

In order that the public should be impressed with the importance of observing strictly the rules of health, we caused to be distributed a large number of copies of Rules and Regulations of Health.

We would again call your attention to the following extract of the Public Statutes in regard to nuisances:—

*Chapter 80, Section 18.*

“The Board of Health of a Town shall make such regulations as it judges necessary, for the public health and safety, respecting nuisances, sources of filth, and causes of sickness within its Town.

“Whoever violates any such regulation shall forfeit a sum not exceeding one hundred dollars.”

Wherever contagious diseases have been found to exist, the premises have been inspected by the Board, all unsanitary conditions remedied and thoroughly fumigated.

The past year has been one of progress relative to the work of this Department. The plan established by the Board of house to house inspection has been carried out as far as the money would allow for this purpose, with good results in the localities where such efforts are needed to force upon the residents the necessity of cleanliness.

There have been three hundred and fifteen vaults and cesspools cleansed during the year and twenty cesspools constructed under the direction of the Board.

We have granted sixteen licenses to residents to maintain boarding houses for infants, after inspecting the premises in each case, and feeling satisfied that the sanitary conditions were favorable.

Thirteen licenses to keep pigs were granted in such places

as we deemed would not interfere with the sanitary condition of the Town.

We would recommend that a contract be made with some responsible party to collect ashes, swill and garbage, as often as once a week. This will insure a generally improved sanitary condition in and around all premises.

GEORGE W. GALE, M. D., Chairman.

LEVI G. HAWKES, Secretary.

BENJAMIN F. ROBINSON, Inspector.

			\$62,837 55

Total tax for state, county and town purposes committed to  
Lewis J. Austin, Collector, \$58,837.55.

Rate of taxation per \$1,000, \$19.

The average tax rate in towns and cities in the state for the  
year 1895 is \$14.95 per \$1,000.

The law relating to the taxation of land taken from other  
towns and cities, for water supply, has been changed. The  
law as amended states that land so taken cannot be entered

in the list of taxable property, but a demand must be made in the form of a bill containing a schedule of all land taken for said purpose and presented to the proper authorities for settlement.

In accordance with the new law a bill has been filed with the Mayor and Aldermen of Lynn, through the Town's counsel, for all land taken from Saugus for water supply previous to May 1, 1895.

From information obtained from the Registry of Deeds and other sources, 333 acres have been taken, and an average valuation of sixty dollars per acre placed thereon, making the amount of tax levied \$379.62.

This does not include the land and buildings of Elijah Wilson and eleven acres of land of Catherine Burns, as the authorities of Lynn have signified their willingness to pay the taxes as assessed to said Wilson and Burns.

The adjustment of this claim against the city of Lynn is now pending, with every indication of a satisfactory settlement.

The Assessors hereby recommend the sum of \$425.00 be appropriated to meet the estimated expenses of their department for the year 1896.

## CONSTABLE AND POLICE REPORT.

---

Whole number of arrests made during the year ending December 31 by Constable and other officers, 81; larceny, 1; assault and battery, 11; disorderly conduct, 1; liquor nuisance, 4; embezzlement, 1; bastardy, 1; drunkenness, 30; present at cock fight, 4; illegal keeping intoxicating liquors, 2; cruelty to animals, 4; riding bicycles on sidewalk, 14; present at game cards on the Lord's day, 3; felonious assault, 1; using threatening language, 1; persons arrested on capias, 2; larceny from a building, 1; whole number search warrants served for intoxicating liquors and stolen goods, 7. Liquor was found in four places, stolen goods in one place.

By request of George M. Amerige, Trial Justice, Charles F. Clark, one of the Board of Selectmen, was appointed Court Officer, at a meeting held by the Board, to take charge of the cases and present them to the court.

The receipts from the court, the year ending December, 1895, has nearly paid the services of the police, it amounting to five hundred nine dollars (\$509), a large portion of which was spent in North Saugus, owing to the work of the Lynn water works. The city of Lynn has agreed to reimburse that part of the expenditure.

In closing I wish to extend my thanks to George M. Amerige, Esq., Trial Justice, for favors given during the year, and also to the officers of the Department for their faithful services.

Respectfully yours,

CHARLES F. CLARK, Court Officer.

FRANCIS W. CLARK, Constable.

### TRUSTEE'S REPORT.

In reading the library report for the last year, it is necessary when comparing it with that of the preceding year to take into consideration the following facts. 1st. The almost phenomenal increase in number of new names registered in the '94 report was due to the fact that delivery in the different parts of the town was established and books were used by the pupils in their school work to a great extent, and the trustees wish to state that they have kept pace so far as possible with the wants of the teachers for their pupils.

2. This report will show a seeming decrease in the number of books loaned during the past year while in reality the number is up to standard. In past years it has been the rule that a book out more than two weeks and subject to a fine was counted as another loan, but with our new librarian this rule has been changed, and this will show a number well into three figures in the year's time.

3. The distribution of books in the five parts of the town is a heavy expense when compared with our small appropriation, but the trustees have gladly met the same, feeling that as all parts of the town are equally taxed, all parts should have an equal benefit of the library.

4. The library is in a good condition as shown by the annual examination, but nevertheless books are continually wearing and having to be replaced, or bound, cards, and printed slips of new books have to be paid for, and many items, in themselves small, make our available book appropriation much less than is actually necessary to keep pace with the times. Could the trustees have spent the amount suggested by them in the '93 and '94 report the circulation instead of falling behind would have increased in proportion to preceding years. This last year we have been obliged to spend the greater part of our book money for light fiction and works for the

children and consequently the proportion of standards bought has been small. It has been suggested to us that people had better read the books that are now in the library, and the trustees will agree with this suggestion in a measure, for there are many books written by the best authors that are seldom used, but the majority demand light reading and it is absolutely necessary for us to give the taxpayers what they demand, as we are their servants and must do as they wish. To the writer's mind it is a mistaken idea on the part of town officers that they are elected by the citizens to do as they themselves please; their every effort should be to find out the will of their constituents and to do it.

The library trustees have in addition to salaries and expenses 1,300 minds to please on \$453, and the people must not censure us too severely if we fail in some respects.

A new catalogue is becoming more and more necessary, but this calls for an expense of \$300 at the very least and at the present time we do not feel like asking the town for so much money in addition to our regular appropriation, which this year we feel should be \$300 and the dog tax. This amount seems to the trustees to be as little as the town can afford to appropriate for the educational purposes of our citizens.

It has been spoken of to the trustees that the removal of the library to the second floor of the old town hall (now used as a school), when such a thing shall become possible would be a very advisable and proper thing to do, as we could then have a reading-room and give the public freer access to reference books, public documents, magazines and papers; this would give a stimulus to reading and education, which is so necessary to both young and old to keep pace with the times. Without taking more space in the report we would ask the town's people to give this matter consideration.

We have our U. S. senator, Hon. H. C. Lodge, our state senator, Hon. H. H. Atherton and H. O. Moore, Asst. Adjutant-General at Washington, to thank for some very valuable books presented to the library, Mrs. Henry E. Newhall, Lynn, Miss Mary E. Thayer, Mrs. S. S. Butterfield, Mrs. F. C. Cheever for magazines, also the Lynn *Item* for publishing lists of new books throughout the year.

Our librarian, Miss Emma E. Newhall, who is well trained in library work, is able and very willing to help readers in choosing books and to give any information which will make the library a benefit to the people of the town.

Invitation is given to teachers to visit the library and confer with the librarian in regard to books for the schools and general public.

## REPORT OF THE SCHOOL COMMITTEE.

---

*To the Citizens of Saugus:—*

The School Committee respectfully submit their annual report for the year ending Dec. 31, 1895.

### *School Buildings.*

We are pleased to say that much improvement has been made in some of our school buildings during the year, in the way of heating, ventilating and renovating.

The shabby building at the Centre, used as a grammar school has been transformed into as pleasant and tasteful a building, especially the interior, as can be desired. The old school building at Cliftdale has been greatly improved, and the heating and ventilating is now very satisfactory. The floors, walls and ceilings, however, require attention.

We believe money could nowhere be more judiciously expended than in making the rooms in this building sweet and wholesome.

### *Heating and Ventilating.*

The three school buildings at Cliftdale will, we think, now comply with the state regulations.

When the new school building at the Centre is erected, that section of the Town will also have buildings thoroughly heated and ventilated.

The four-room building at East Saugus, like the building at North Saugus and Oaklandvale, has no ventilation whatever, being heated by stoves.

The State Board has been very patient and lenient with us in our slow compliance with its demands. It will not, however, permit us longer to put off the ventilating of the East Saugus building.

One of the members of the Board has again made a visit to the building for the purpose of testing the quality of air as breathed by the pupils, and found it so much below the test grade even on an unfavorable time (it being a warm day with

windows open) as to cause him to condemn the building. If we do not make some effort to remedy the evil, no doubt we shall be compelled to do so. We would therefore recommend that an appropriation be made at our March meeting for the purpose of excavating a cellar, erecting stacks for ventilating and putting in furnaces and toilets. The latter may be connected with the sewer at a small expense. An appropriation should also be made to put in suitable condition the Oakland-vale building. A large amount would not be required for this purpose.

*Condition of the Schools.*

The work in some of the schools at the Centre has been very much broken up by reason of the interruptions caused by moving and repairing of the two buildings; but aside from this, the schools as a whole have shown great improvement. One need but investigate to be convinced of this. We would call attention to the reports of the Superintendent and Principal of the High School for comprehensive statements of advances made and other interesting facts pertaining to the needs of our schools.

*Appropriations.*

The larger school buildings, the care required to keep them in good order, the greater amount of fuel consumed in heating, and the increased number of schools demand a larger appropriation for the coming year. Pupils are rapidly increasing in number—which facts call for a larger outlay for supplies. After a careful consideration we have estimated that \$14,000 at least will be required to meet the expenses for the coming year.

The citizens have cheerfully and readily responded to the suggestions of the Committee in the past, usually voting the amount called for, showing a confidence in the Committee which we trust will not be abused.

HENRY J. MILLS,  
GEORGE M. AMERIGE,

## REPORT OF THE SUPERINTENDENT.

---

*To the School Committee,*

Gentlemen: I hereby submit to you my second annual report.

A retrospect of the work of the schools for the year just closed is in the main satisfactory. Notwithstanding the interruptions caused by the prevalence of contagious diseases, and the annoyance caused by the condition of the school-houses at Saugus Centre at the opening of the fall term, the year has been one of advancement. While our schools are not yet in the most desirable condition, they are better graded, better supplied with books and more efficiently taught than one year ago.

Our teachers' meetings have been productive of much good. They have been held weekly for most of the year. Once each month we have a meeting for all the teachers. In these we have considered subjects of general interest such as "School Discipline," "The Personality of the Teacher," "Moral Education," "Habit in Education," "Physical Education," "The Study of Children" and "Attention and Interest." In each of these meetings several teachers and the superintendent have taken a part in the presentation and discussion of the topic.

We have also held numerous grade meetings—three grades at each meeting—in which we have considered the subjects and methods of teaching for each grade. The study of plants and birds was given considerable attention in the spring. This work was introduced somewhat in all the schools. It was found to be a very interesting and valuable addition to our course of study.

*High School.*—Steps have been taken looking towards great improvement in our high school. At the beginning of the fall term two assistants were employed, making it possible to enlarge and extend our course of study. This we have already done although it will take some time before the new four-years' course is in full operation.

When the new building is ready for occupancy with the opportunities which it will afford for teaching the sciences by the laboratory method we shall have a school of which the town may well be proud. Your attention is called to the report of our high school principal, Mr. Emrich.

"During the year just closed there have been several changes of special interest in our High School.

"The Entering Class this fall was much larger than ever before. This class of over 30 pupils increasing the membership of the school to 65, made it necessary to put desks into one of the small rooms used for a recitation room and to have a part of the school sit there during the school session.

"The larger membership of the school and the changes in the course of study have led the school committee to give us a third teacher.

"The Course of Study has been revised and enlarged. The Course in Chemistry and Physics has been extended. This department has suffered much in the past from the short space of time allotted to its study and more especially from the lack of a laboratory without which the study of these sciences is, to put it very mildly, pursued at the greatest disadvantage.

"The Study of Greek has been added to the Course of Study; so that now it will be possible for the boy or girl, wishing to fit for college, to do so at home. While the requirements for admission to our New England colleges has been kept in mind in revising the Course of Study, we have also not forgotten that the larger part of our pupils complete their studies in our High School. With this in view, in addition to the four years' Classical Course, there is a three years' and a four years' English Course for the benefit of those who feel they must end their studies in the High School and desire a course practical rather than preparatory.

"The year has been of special interest to your High School in that it has seen the town make an appropriation for a school-building in which there should be ample accommodations for the High School with its necessary laboratories and recitation rooms.

"In making this appropriation the Town has recognized a long-felt need and it is hoped that we may soon be in a posi-

tion to do our work with advantages for its prosecution equal to those of neighboring towns of the same size.

"Many citizens are not aware that we are occupying three rooms in the town hall building which were never designed for school rooms and which are therefore neither properly ventilated, lighted nor adequately supplied with blackboards.

"I am of the opinion that many colds and much sickness is directly due to the poor facilities for heating and ventilating our school rooms.

"The High School of Saugus, within ten miles of such an educational centre as Boston, surrounded by such schools as we have in Malden, Everett and Lynn, ought in behalf of the interests of the boys and girls of our town, in behalf of the reputation of the town, yes, in behalf of the purely selfish interests of the town to be made to stand on a level with schools of its size in respect to the equipments for its work; and then we may expect to see boys and girls prepared for the college or the counting-room as well in Saugus as in our neighboring towns."

The net proceeds of the Bond Prize Exhibition was \$22.65. We have expended for books \$5.30, leaving a cash balance Jan. 1, 1896, of \$17.35.

*Music.*—The work in this subject has been continued much the same as last year. The new teacher is in sympathy with the system and methods used by her predecessor. In music as in other studies our pupils are learning to *think*. Accuracy in reading, fidelity to pitch, distinct articulation and enunciation, and sweet, clear tones are, to quite an extent characteristics of our pupil's work.

Miss Page the supervisor of Music says:

"Our aim is to so present the work from the lowest to the highest grades that the result may correspond to that obtained in other studies.

"When the child first enters school the study of the scale as a whole is commenced. Following this is the process of teaching the child to think the intervals of the scale so that the relation of each tone to the scale as a whole is accurately known. This work which comes in the lower grades is, per-

haps, the most important—for the success of all future work depends upon the correct conception of tones of the major scale.

“Next, the printed page is placed before the pupils and the study of time is introduced. Though we advocate the use of time language yet it must always be regarded as a ‘means to an end, and not as being itself an end.’

“The music of the second and third grades is simple, adapted to the condition of the child. In the higher grades part singing is commenced, greater difficulties in time and tune are found, and modulation together with chromatic and minor scales are taught.

“It is expected that the pupils graduating from the grammar grades will be able to sing ordinary music at sight. In the primary grades a few rote songs are taught chiefly to afford mental rest and recreation. They are of assistance also in the training of the ear and voice.

“We advise the use of syllables as a valuable aid to instruction in sight singing, yet would consider it a serious mistake to use them to an extent which would make it impossible for the pupils to sing at sight when not using them. Systematic practice of vocalizing all exercises sung in the study of sight-singing will enable the pupils to outgrow the necessity of their use.

“Too much stress cannot be laid upon the quality of tone. To cultivate the quality of sweetness, which properly developed is one of the prominent characteristics of the child voice, we have insisted upon soft singing and I am pleased to note the improvement in this direction.

“The results of the past term from the primary grades through the High School are very pleasing, but we hope the work of the coming six months may show even greater improvements.”

*Teachers.*—The following are the changes in our corps of teachers for the year:

*Withdrawals.*

Estella J. Clark, North Saugus.

A. M. Gove, East Saugus.

Jean Belsher, Music.

Edith O. Rowe, High School.  
Elizabeth Hoar, Oaklandvale.  
C. C. Farnham, Cliftondale.  
E. W. Boardman, Centre.  
Marion Conn, North Saugus.

*Elections.*

Marion Conn, North Saugus.  
Helen Bacheller, High School.  
Grace Putnam, High School.  
Carrie A. Barber, East Saugus.  
Alice E. Chase, Cliftondale.  
Harriot Sanborn, Ashlandvale.  
Helen M. Page, Music.  
Annie L. Ricker, Centre.  
Agnes S. Ord, Cliftondale.  
M. A. Plummer, North Saugus.

There have been too many changes in our teaching force this year, but not more than may be expected as long as salaries are so small. Nearly every city and town in this part of the state pay enough more than we do so that our good teachers may readily secure better positions than we can offer. Then, too, in seeking for teachers whenever vacancies occur, we are not able to secure as desirable candidates as our neighbors. The cost of board in Saugus is as much if not more than in the cities of Lynn and Malden. A part of our teachers have been paying six dollars a week for room and meals. The highest salary we now pay any primary teacher is \$380. Measured by the needs of a full year this is very meager. In Lynn and Malden the maximum is not less than \$600. In Winthrop, Watertown, Revere and Melrose, they pay primary teachers as high as \$550; in Hyde Park, Peabody, Norwood, Dedham and Swampscott, \$450. In fact there are but few of the towns in this part of the state that do not pay primary teachers more than Saugus.

The highest annual salary we pay grammar teachers is \$420. What do our neighbors pay? Arlington, Dedham, Everett, Lynn, Malden, Wakefield, Revere, Reading, Swampscott and

Watertown, pay not less than \$600 maximum. Belmont, Melrose, Medford, Norwood, Peabody, Hyde Park, Winchester, Woburn and Stoneham, pay from \$500 to \$550 maximum. Nearly all towns in this vicinity are paying more to the grammar teachers than Saugus.

In response to inquiry I have received information from nearly forty cities and towns within fifteen miles of Boston. Of these I find only six which have not increased the salaries of teachers within five years. In a few cases the increase in this time has been 25 per cent. Of those which have made no recent increase all with one exception are paying good salaries—more than we are. If we would keep pace with recent and widespread educational progress, we must pay higher salaries. We are paying our teachers the wages of a common laborer while we demand the skill of a professional expert. We desire as good teachers as are found anywhere, but we pay from 25% to 37% less than the prevailing salary of such teachers.

The school appropriation should be enough to make it possible for the school committee to pay first class primary teachers not less than \$450 and grammar teachers \$500.

I should urge discrimination. Not all primary or all grammar teachers should necessarily be paid the maximum. Only those of the greatest efficiency and success should receive the highest salary. I should favor a gradual increase.

In this connection I desire to recommend the employment of a teacher of drawing. This study is required by the laws of the state to be taught in the public schools. Its importance is universally admitted. But it cannot be satisfactorily taught without the supervision of a specialist. For a small amount we could employ a skillful teacher two days each week who would systematically plan the work, visit all the schools regularly to give lessons and assist the regular teachers. If such a specialist could be added to our teaching force it would be the means of greatly improving our schools.

*Cost of Schools.*—It may be urged that our schools now cost us more per scholar than some of our neighboring cities. This statement has been publicly made but it is not true. The mistake, I presume, was made by basing the computation

upon the number of children between five and fifteen years of age. This number often differs greatly especially in cities from the number actually attending the public schools. A little thought will make it apparent that this latter number is the one to use in ascertaining the cost per scholar of maintaining our public schools. It may be of interest, therefore, to examine the following table based upon the returns of 1894-95 made to the State Board of Education in April, 1895.

**Amount Expended for the Maintenance of Public Schools,  
1894-95.**

CITIES AND TOWNS.	Amount Expended Exclusive of Repairs and Buildings.	Average Membership of All Schools.	Amount for Each Child.
Malden .....	\$ 102,043 38	3991	\$28 07
Belmont .....	11,556 16	412	28 26

Saugus .....	12,937 72	705	18 43
The State .....	8,160,452 37	341,671	23 88

In the amount expended we have included all money used in the School Department except the cost of new buildings, permanent alterations, all repairs and income from local funds. In the next column is given the actual membership of the schools and in the last column is placed the amount expended for each child. It will be observed that the average amount expended for each child throughout the whole state is \$23.88. This is \$5.45 more per scholar than Saugus expended. It seems evident that many cities and town expend more than \$25 for each pupil, and it is equally evident that the number of public school children in this state whose education annually costs less than \$20 is comparatively small.

The membership of the schools of Saugus during this fall

term has been about 800. It will probably be more for the year to come. The appropriation should be not less than \$14,000, not including the Superintendent's salary.

If the Town is ready to increase the teachers' salaries a little, employ a drawing teacher and better equip our schools with text and reference books, the appropriation should be \$15,000.

The efficiency of our schools will be measured largely by the cost of maintenance. While we cannot as generously provide as the more wealthy municipalities, we can, I feel sure, more nearly approach the average state of expenditure.

*School Hygiene.*—The experiences of the year have led to careful consideration of this subject. Several of our schools—those of Cliftondale more than once—have been disturbed by an outbreak of scarlet fever and diphtheria. This is unfortunate both in regard to health and education. When schools are closed, even for one week, the interruption is considerable and the anxiety of parents is unnecessarily great. The interruption is considerable because its effects continue for weeks. The diseases of school life have been too common. They appear so mysteriously in the midst of health and apparently healthful surroundings that not even the greatest care can prevent occasional cases. This may be expected, I think, but every possible preventive should be used. I have no sympathy with the notion that every child must sooner or later have measles, chicken pox, scarlet fever and other diseases. I believe it to be our duty, as well as that of every parent, to prevent children if possible from contracting these diseases, for very serious results often follow the mildest cases. But what can we do? A very important sanitary consideration in any school is the cleanliness of the building. I urge that all school rooms be thoroughly washed, cleansed and fumigated at least twice each year. Let the work be well done. All floors and woodwork, as well as windows, including the pupils' desks, should be made clean. (If floors are old, with dust-collecting cracks, new floors should be laid.)

In the interest of health, I recommend also that the use of the slate and dirt-collecting sponge be forever banished from our schools. To continue their use is too great a risk.

The extra expense necessary to provide paper is not worth considering in view of the greater safety.

Again I suggest that all outbuildings and closets should be cleaned as often as necessary to keep them in wholesome condition. Some of these buildings as now arranged are a constant menace to the health and morals of our pupils. Despite the efforts of teachers and janitors they are often in a filthy condition and scrawled with obscenity. May the time soon come (I think it will) when light, neatly furnished water closets or other sanitary closets will be connected with all our school buildings.

Under no circumstances should children from homes in which there is a communicable disease be allowed to attend school or to go to other homes to play with school children. It is quite possible that parents have not always taken the precaution necessary to prevent the spread of fruitful germs of disease. Children should be kept at home for at least two weeks after the death, removal or recovery of the sick persons. Even then they should never be allowed to return to school without a certificate from the physician or Board of Health. This requirement should without exception be rigidly enforced.

That good ventilation is necessary to the best health of school children is freely admitted. We do not care to have them breathe the air polluted by foul breath, bodily exhalations or dirty clothing. It must be remembered that children are much more susceptible than adults to injury from impure air. Such injury often acts slowly and almost imperceptibly upon the system, but its effects will sometime be seen, perhaps when too late to repair the harm. And so we take real pleasure in recording the fact that two of our buildings have been so much improved. During the summer vacation the old building at Cliftondale was provided with furnaces and ventilating flues. If now it could be completely renovated inside, new floors laid and sanitary closets put in, it would meet all the essential requirements.

The old Grammar School building at the Centre has also been improved in a very thorough and satisfactory manner. It is now heated by steam, is well ventilated, has a good basement in which are the water closets, has new hard-wood floors

and new walls and ceiling. If this building could have been ready for occupancy in September, as was expected, it would have prevented serious inconvenience. The long delay in beginning repairs and the slowness with which the work progressed was a costly and seemingly unnecessary procedure. As a consequence, one school, for three months, was transported daily to and from East Saugus. Another occupied the Town Hall for nearly the same length of time. Both schools have worked under great disadvantage, but are now well cared for.

We cannot speak as favorably of the accommodations of the other schools at the Centre. They are all in great need. The High School is suffering, and the intermediate and primary schools are suffering.

The school in charge of Miss Groce is occupying a room wholly unfit for school purposes. Every pupil attending that school does so at considerable danger to health. The two primary schools are full to overflowing, and that too in rooms heated by stoves and without means of ventilation except the windows. We have already more children in this ward than the present school rooms will accommodate, and the number is steadily increasing; but we cannot increase the school membership until the new building is ready. Relief was expected before this, but still we wait.

At East Saugus we have a very good building, containing four large school rooms, but it is heated by stoves and is ventilated only by doors and windows. This building should be furnished with good ventilating flues, a proper system of heating and wholesome sanitary arrangements. A good cellar should of course be included in the plans. These changes could easily be made during the summer vacation, and they should be.

At the Oaklandvale building may be seen a pleasant school very uncomfortably housed. They have been patiently waiting for something better, and they should have it at the earliest date possible. Pupils who are obliged to spend hours each day in a room the walls of which are blackened and defaced, having battered desks, scratched and disfigured by the "jackknife's carved initial," will be somewhat affected by the character of

the place. In addition the renovation of the whole interior new school furniture should be provided. The pupils' desks now in use should be replaced at once by new ones of approved pattern. Doors and windows of the lower story should be furnished with such secure fastenings that evil-disposed persons cannot so easily affect an entrance.

The North Saugus schoolhouse has had a new floor laid and if the walls and ceiling were whitened would be in fair condition.

*School Visitation.*—We have been pleased to notice the increased number of visitors in our schools this year. Parents would be of much assistance if they would visit schools oftener. A special invitation was issued to our friends to visit the different schools in June on days especially appointed. The response was gratifying. Many visited the schools these days that would not otherwise have done so. However, parents can gain a much more satisfactory idea of the school if they visit during the regular exercises. You are cordially invited—yes, urged—to visit often and without any special invitation. “Frequent visitation of school stimulates and encourages both pupil and teacher, and is one of the most helpful forms of assistance the parent can render. To secure the best results there must be confidence and coöperation between parents and teacher.”

Respectfully submitted,

C. E. STEVENS,

*Superintendent.*

## CERTIFICATES.

---

No child *under sixteen years of age* can lawfully be employed in any factory, workshop or mercantile establishment unless his employer keeps on file his employment ticket and certificate. To obtain the certificate the person intending to employ the child must fill out the prescribed employment ticket. Blanks may be procured of the Superintendent. After obtaining the employment ticket, properly filled out, the child, accompanied by his father, if a resident of the town; if not, by his mother or legal guardian, may obtain a certificate from the Superintendent of Schools.

For the benefit of those interested a brief statement of the laws concerning the employment of children is here given.

1. No child under thirteen years of age can be employed in any factory, workshop or mercantile establishment.

2. No child under thirteen years old can be employed for wages, in any indoor work, during public school hours; nor in any other manner (as without wages or out of doors) during school hours, unless said child has attended school thirty weeks during the preceding year.

3. No child under fourteen years of age can be employed before six o'clock in the morning, nor after seven in the evening.

4. No child under fourteen years of age can be employed in any factory, workshop or mercantile establishment except during vacations, unless the employer keeps on file a certificate of age and schooling, and an employment ticket, nor can any child under fourteen years be employed in any indoor work for wages, during school hours, unless he has attended school at least thirty weeks during the year next preceding.

5. The Age and School Certificate belongs to the minor employed, and must be surrendered to him or her when he or she leaves the service of the employer.

# EXTRACTS FROM THE PUBLIC STATUTES OF THE COMMONWEALTH.

---

## CHAPTER 47.

### CONCERNING VACCINATION.

Section 9. The School Committee shall not allow a child who has not been duly vaccinated to be admitted to or connected with the public schools.

## CHAPTER 515, ACTS OF 1894.

### AN ACT RELATIVE TO VACCINATION.

Section 1. Parents and guardians shall cause their children and wards to be duly vaccinated before they attain the age of two years, except as provided in section two of this act. For every year's neglect the party offending shall forfeit the sum of five dollars.

Section 2. All children who shall present a certificate signed by a regular practicing physician that they are unfit subjects for vaccination shall not be subject to the provisions of section nine of chapter forty-seven of the Public Statutes excluding unvaccinated children from the public schools, and all children upon such a certificate shall be exempted from the provisions of this act, and the parents and guardians of such children shall not be liable to the penalties imposed by section one of this act.

## CHAPTER 198.

### AN ACT TO PREVENT THE SPREAD OF CONTAGIOUS DISEASE THROUGH PUBLIC BUILDINGS.

The School Committee shall not allow any pupil to attend the public schools while any member of the household to which the pupil belongs is sick of small-pox, diphtheria or scarlet fever, or during a period of two weeks after death, recovery or removal of such sick person; and any pupil coming from such household shall be required to present to the teacher of the school the pupil desires to attend a certificate from the attending physician or board of health, of the facts necessary to entitle him to admission in accordance with the above regulation.

## CHAPTER 203.

## CONCERNING INJURY TO PUBLIC SCHOOLS.

Whoever willfully and maliciously or wantonly and without cause, destroys, defaces, mars, or injures a schoolhouse, church or other building erected or used for purposes of education or religious instruction, or for the general diffusion of knowledge, or an out-building, fence, well or appurtenance of such schoolhouse, church or other building, of furniture, apparatus or other property belonging to or connected with such schoolhouse, church or other building, shall be punished by fine not exceeding five hundred dollars, or by imprisonment in the jail not exceeding one year.

## CHAPTER 498, ACTS OF 1894.

AN ACT RELATIVE TO THE ATTENDANCE OF CHILDREN  
IN THE SCHOOLS.

Section 1. Every person having under his control a child between the ages of eight and fourteen years, and in every city and town where opportunity is furnished, in connection with the regular work of the public schools, for gratuitous instruction in the use of tools or in manual training, or for industrial education in any form, a child between the ages of eight and fifteen years, shall annually cause such child to attend some public day school in the city or town in which he resides, and such attendance shall continue for at least thirty weeks of the school year, if the schools are kept open for that length of time, with an allowance of two weeks' time for absences not excused by the superintendent of schools or the school committee. Such period of attendance shall begin within the first month of the fall term of school, and for each five days' absence of any such child thereafter, in excess of the above allowance, before the completion of the required annual attendance of thirty weeks, the person having such child under his control shall, upon the complaint of the school committee or any truant officer, forfeit to the use of the public schools of such city or town a sum not exceeding twenty dollars, but if such child has attended for a like period of time a private day school approved by the school committee of such city or town, or if such child

has been otherwise instructed for a like period of time in the branches of learning required by law to be taught in the public schools, or has already required the branches of learning required by law to be taught in the public schools, or if his physical or mental condition is such as to render such attendance inexpedient or impracticable, such penalties shall not be incurred.

#### CHAPTER 508, ACTS OF 1894.

##### SANITARY PROVISIONS AND PROPER VENTILATION.

Section 40. Every public building and every schoolhouse shall be kept in a cleanly state and free from effluvia arising from any drain, privy or other nuisance, and shall be provided with a sufficient number of proper water closets, earth closets or privies for the reasonable use of the persons admitted to such public building or of the pupils attending such schoolhouse.

Section 41. Every public building and every schoolhouse shall be ventilated in such a proper manner that the air shall not become so exhausted as to be injurious to the health of the persons present therein. The provisions of this section and the preceding section shall be enforced by the inspection department of the district police.
